MS-PS3 Energy

MS-PS3 Energy	<p>Students who demonstrate understanding can:</p> <p>MS-PS3-1. Construct and interpret graphical displays of data to describe the relationships of kinetic energy to the mass of an object and to the speed of an object. [Clarification Statement: Emphasis is on descriptive relationships between kinetic energy and mass separately from kinetic energy and speed. Examples could include riding a bicycle at different speeds, rolling different sizes of rocks downhill, and getting hit by a wiffle ball versus a tennis ball.]</p> <p>MS-PS3-2. Develop a model to describe that when the arrangement of objects interacting at a distance changes, different amounts of potential energy are stored in the system. [Clarification Statement: Emphasis is on relative amounts of potential energy, not on calculations of potential energy. Examples of objects within systems interacting at varying distances could include: the Earth and either a roller coaster cart at varying positions on a hill or objects at varying heights on shelves, changing the direction/orientation of a magnet, and a balloon with static electrical charge being brought closer to a classmate’s hair. Examples of models could include representations, diagrams, pictures, and written descriptions of systems.] [Assessment Boundary: Assessment is limited to two objects and electric, magnetic, and gravitational interactions.]</p>
----------------------	---

The performance expectations above were developed using the following elements from the NRC document *A Framework for K-12 Science Education*:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>Developing and Using Models</p> <p>Modeling in 6–8 builds on K–5 and progresses to developing, using and revising models to describe, test, and predict more abstract phenomena and design systems.</p> <ul style="list-style-type: none"> ▪ Develop a model to describe unobservable mechanisms. (MS-PS3-2) <p>Analyzing and Interpreting Data</p> <p>Analyzing data in 6–8 builds on K–5 and progresses to extending quantitative</p>	<p>PS3.A: Definitions of Energy</p> <ul style="list-style-type: none"> ▪ Motion energy is properly called kinetic energy; it is proportional to the mass of the moving object and grows with the square of its speed. (MS-PS3-1) ▪ A system of objects may also contain stored (potential) energy, depending on their relative positions. (MS-PS3-2) <p>PS3.C: Relationship Between Energy and Forces</p> <ul style="list-style-type: none"> ▪ When two objects interact, each one 	<p>Scale, Proportion, and Quantity</p> <ul style="list-style-type: none"> ▪ Proportional relationships (e.g., speed as the ratio of distance traveled to time taken) among different types of quantities provide information about the magnitude of properties and processes. (MS-PS3-1) <p>Systems and System Models</p> <ul style="list-style-type: none"> ▪ Models can be used to represent systems and their interactions – such as inputs, processes, and outputs – and

<p>analysis to investigations, distinguishing between correlation and causation, and basic statistical techniques of data and error analysis.</p> <ul style="list-style-type: none"> - Construct and interpret graphical displays of data to identify linear and nonlinear relationships. (MS-PS3-1) 	<p>exerts a force on the other that can cause energy to be transferred to or from the object. (MS-PS3-2)</p>	<p>energy and matter flows within systems. (MS-PS3-2)</p>
<p><i>Connections to other DCIs in this grade-band:</i> MS.PS2.A (MS-PS3-1);</p>		
<p><i>Articulation across grade-bands:</i> 4.PS3.B (MS-PS3-1); HS.PS2.B (MS-PS3-2); HS.PS3.A (MS-PS3-1); HS.PS3.B (MS-PS3-1); (MS-PS3-2) HS.PS3.C (MS-PS3-2)</p>		
<p><i>Common Core State Standards Connections:</i></p>		
<p><i>ELA/Literacy –</i></p>		
<p>RST.6-8.1 Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions (MS-PS3-1)</p>		
<p>RST.6-8.7 Integrate quantitative or technical information expressed in words in a text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table). (MS-PS3-1)</p>		
<p>SL.8.5 Integrate multimedia and visual displays into presentations to clarify information, strengthen claims and evidence, and add interest. (MS-PS3-2)</p>		
<p><i>Mathematics –</i></p>		
<p>MP.2 Reason abstractly and quantitatively. (MS-PS3-1)</p>		
<p>6.RP.A.1 Understand the concept of ratio and use ratio language to describe a ratio relationship between two quantities. (MS-PS3-1)</p>		
<p>6.RP.A.2 Understand the concept of a unit rate a/b associated with a ratio $a:b$ with $b \neq 0$, and use rate language in the context of a ratio relationship. (MS-PS3-1)</p>		
<p>7.RP.A.2 Recognize and represent proportional relationships between quantities. (MS-PS3-1)</p>		
<p>8.EE.A.1 Know and apply the properties of integer exponents to generate equivalent numerical expressions. (MS-PS3-1)</p>		
<p>8.EE.A.2 Use square root and cube root symbols to represent solutions to equations of the form $x^2 = p$ and $x^3 = p$, where p is a positive rational number. Evaluate square roots of small perfect squares and cube roots of small perfect cubes. Know that $\sqrt{2}$ is irrational. (MS-PS3-1)</p>
